

PRESS RELEASE

THE INTERNATIONAL CONFERENCE "BASKET OF RAW MATERIALS NON-FOOD FOR BIOFUELS PRODUCTION" IS OPEN FOR REGISTRY.

The international conference "Basket of Raw Materials NON-FOOD for biofuels production, that will take place in Madrid on the 24th of September 2009, will become in a forum of reference for the divulgation of some of the raw materials non-food with most possibilities for the biofuels production.

The growing demand of biofuels, this due to the need of reducing the current oil dependency, is forcing to search alternative raw materials that do not interfere with the feeding chain. Thus, numerous efforts have been put together during the last years to carry out research and developing projects that have started to give their results through the production of biofuels from raw materials that are destined neither to human or animal feed.

In this context, Global Energy (www.globalenergy.es) pioneer organizer of singular international related to the biofuels sectors, in its eagerness to contribute to the development and divulgation of these investigations, is currently organizing the international conference "Basket of Raw Materials Non-Food for Biofuels Production", where the relevant experiences, as well as the future of the biofuels production from raw materials non-food -such as Dende Palm, Guindilla, Chumbos, Postia Fungus, Jatropa or Microalgae, between others- will be presented in detail.

This conference, that will count with the participation of important specialists, technicians and researchers in each of the above mentioned matters, will focus the lectures towards practical experiences as well as in techniques of real economic potential, in order to make them useful to the 300 attendees that are estimated will meet the forthcoming 24th of September 2009 in Madrid.
